

Hydraulic Transmission Tester

Test the transmission with fluid under pressure, the Hydraulic Tester simulates operating conditions in the unit and finds problems instantly. The Hydraulic Tester finds hidden defects in soft parts or can alert you to hard parts that have grown out of tolerance. A simple hook up to a unit test plate and the reading of a single gauge allows you to test a transmission in or out of the vehicle

Stator Bush Removal Tool (Sonnax®)

Part Summary:

The pump stator bushings in Renault DPO and Citroen AL-4 transmissions are prone to wear from normal operation, and are difficult to remove without damaging the housing bore I.D. Sonnax offers an improved pump stator bushing kit **DPO.BUS06** and this removal tool to allow easy bushing removal without damaging the bore.

Features & Benefits:

- Bushings are made from steel-backed aluminum alloy for better wear resistance.
- Precision-fit bushings do not require machining.
- Tool allows removal of old bushings without scoring or damaging the housing bore I.D.
- Bushings also available separately.

**Transmission Filling Tool**

It is becoming far less common for transmissions to be provided with filler tubes and dipsticks, most recent units have to be filled via a filler / level bung in the sump pan. Finding methods to force fluid into the transmission in this way can be messy and time consuming, this tool has been specifically designed to make the job easier and cleaner. The tool consists of a 10 litre fluid pump and a set of 10 adaptors, the pump and adaptors are also available separately, so if you need to extend the usefulness of the tool by adding extra pumps or adaptors this can easily be done.
